

‘**Administrative Approval**’ is a process where a self-governing body (e.g., a community group, a local business association, or a neighborhood council) seeks formal approval from a government authority (e.g., a local council or a regulatory body) to exercise certain powers or responsibilities. This process typically involves submitting a proposal, undergoing a public consultation period, and receiving a formal decision from the authority. The approval is often conditional and subject to ongoing monitoring and reporting requirements.

This process typically involves submitting a proposal, undergoing a public consultation period, and receiving a formal decision from the authority. The approval is often conditional and subject to ongoing monitoring and reporting requirements.

‘**Self-Constitute Body**’ is a concept where a group of individuals or organizations forms a self-governing body that has the authority to make decisions and take actions on its own behalf, without the need for external approval. This is often achieved through a process of self-determination, where the group members agree to be bound by the decisions of the body. This concept is often used in the context of community development, social enterprise, and local governance. It is important to note that while a self-constituted body may have the authority to act on its own, it may still be subject to external regulation or oversight, particularly in areas such as health and safety, environmental protection, and consumer protection.
