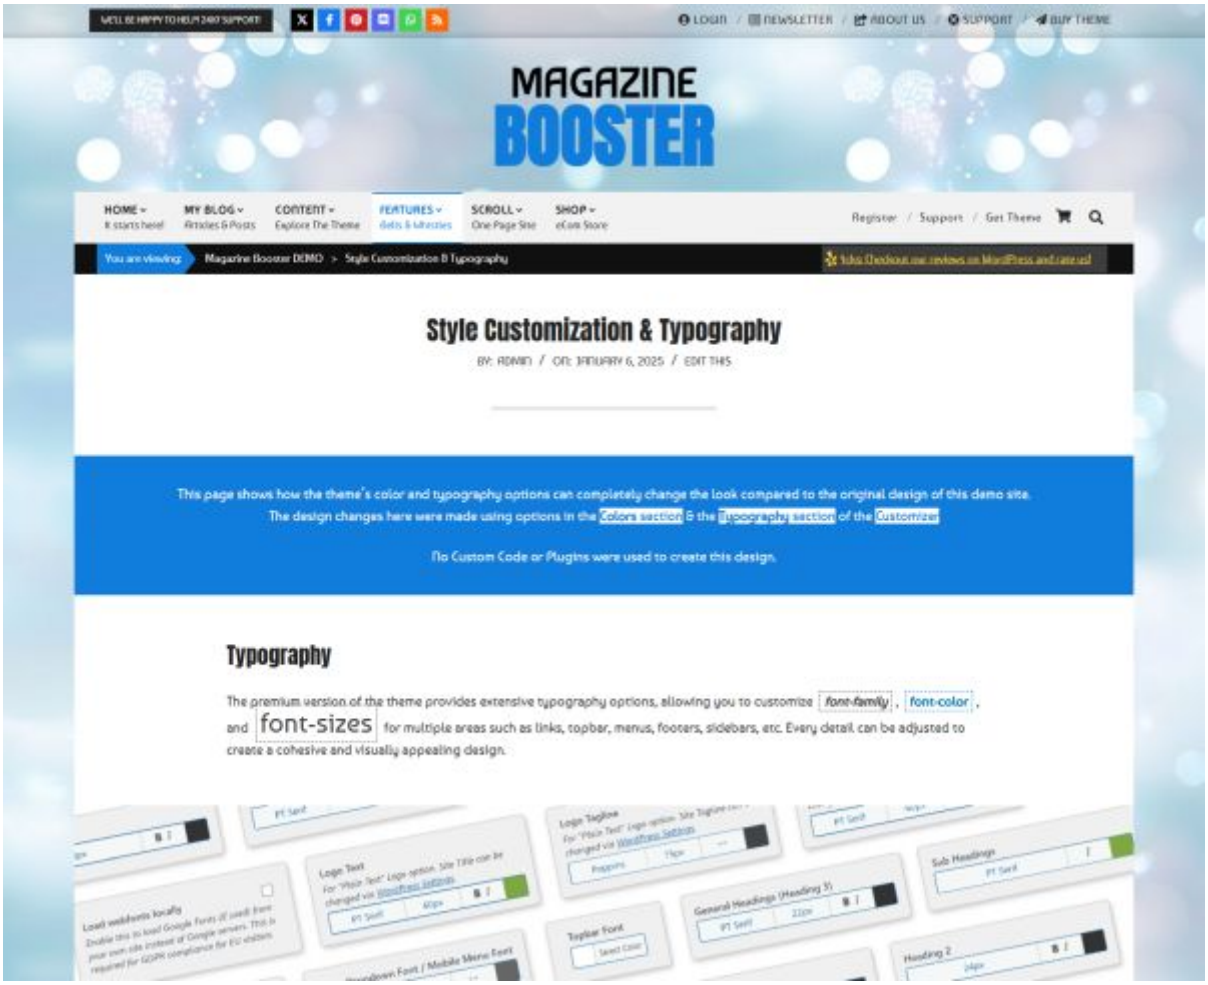
Style Customization & Typography

Posted on January 6, 2025 by Editorial Team



Typography

The premium version of the theme provides extensive typography options, allowing you to customize font-family, font-color, and font-sizes for multiple

areas such as links, topbar, menus, footers, sidebars, etc. Every detail can be adjusted to create a cohesive and visually appealing design.

With support for over 600 Google Fonts, you'll have access to a vast library of typefaces to suit any style or branding. Fine-tune your text by selecting different font weights, giving you complete control over how your content is presented. The flexibility offered ensures that your typography perfectly complements the rest of your design.

Colors & Backgrounds

The premium version of the theme provides extensive color and background customization options directly within the site Customizer. Change the colors for various sections, including the header, footer, menus, dropdowns, and links, to align perfectly with your brand's color palette. Additionally, you can set unique background colors or images for different areas, such as the header and footer, creating a cohesive and personalized look.

With these customization tools, you have the flexibility to design a site that truly reflects your style. Whether you prefer bold, vibrant colors or subtle, minimalist tones, the options are endless. Combine these features with other styling tools to create a visually stunning and professional website.
